JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS
Volume 18, Numbers 1-6, 1977

(A translation of Zhurnal Prikladnoi Mekhaniki i Tekhnicheskoi Fiziki)

Volume 18, Number 1 January-February, 1977

	Engl.	Russ.
N- and S-Modes of Self-similar Compression of a Finite Mass of Plasma and Properties of the Modes with Peaking – N. V. Zmitrenko and S. P. Kurdyumov	1	3
Adiabatic Compression of a Gas by Means of a Spherical Driver – Ya. M. Kazhdan	18	23
Vibrational Relaxation of Polyatomic Molecules in a Field of Monochromatic Radiation behind the Leading Edge of a Shock Wave – V. M. Kuznetsov	24	30
Mutual Effect of Atomic Recombination and Vibrational Relaxation of Br_2 under Conditions of Supersonic Expansion in a Nozzle – A. P. Genich, S. V. Kulikov, G. B. Manelis, and Yu. P. Myagkov	28	35
Resonance CO_2 Absorption (10.6 μ) behind a Shock Front – R. I. Soloukhin and N. A. Fomin	34	42
Existence of Parametrically Bound Waveguides and Solitons in the Presence of Three-Frequency Wave Interaction – Yu. N. Karamzin and T. S. Filipchuk	39	47
Boundary Conditions for Diffusion of a Nonequilibrium Plasma in a Magnetic Field – I. I. Litvinov	44	52
Investigation of the Characteristics of the Ionization Chamber and the Properties of the Flow of a Gas-Discharge Ion Source – V. E. Nikitin, L. V. Nosachev, and V. V. Skvortsov	47	56
Nature of Signal Extracted from a Total Electromagnetic Pulse – V. V. Ivanov, Yu. A. Medvedev, B. M. Stepanov, and G. V. Fedorovich	51	61
Asymptotic Analysis of the Ignition of a Gas by a Heated Surface – V. S. Berman and Yu. S. Ryazantsev	57	68
Numerical Study of the Effect of Surface Thermal Conditions on Flow in the Base Region of a Body of Finite Dimensions – A. V. Babakov and L. I. Severinov	62	73
Structure of a Multicomponent Boundary Layer in Models Undergoing Breakdown – É. B. Georg and M. I. Yakushin	65	76
Collapse of a Spherical Cavity, Induced by an Underwater Spark, near a Solid Wall – V. A. Burtsev and V. V. Shamko	69	80
Propagation of Small Perturbations in a Liquid with Bubbles – V. Sh. Shagapov	77	90
Effect of a Small Viscosity on the Potential Flow of a Liquid with a Free Boundary in the Form of an Ellipse – V. A. Batishchev	87	101
Initial Problem of Fluidization – Yu. A. Buevich and G. A. Minaev	91	105
Two-Dimensional Effects with the Flow of a Reactive Liquid with Properties Varying with the Depth of the Conversion – D. A. Vaganov	98	114
Viscosity-Gravitational Flow in Tubes with a Small Effect of Thermogravitation – A. F. Polyakov	106	122
One Case of Mixed Convection – V. V. Popov	113	130
Irrigation and Aerated-Zone Soils – N. N. Verigin and S. V. Vasil'ev	116	133
Desalination of a Wet Soil – V. I. Pen'kovskii	120	137
Spherical Blast Waves in Soils Inferred from Stress and Strain Measurements – S. S. Grigoryan, G. M. Lyakhov, and P. A. Parshukov	124	142
Interaction between Two Flat Charges Exploding on the Ground – N. B. Il'inskii and N. D. Yakimov	128	147

Engl./Russ.

Spalling in Steel Produced by Explosion of a Sheet Charge and Collision of a Plate – A. P. Rybakov 131 151
Buckling in an Elastic Rod under a Time-Varying Load – A. V. Markin 134 155
A Model for an Anisotropic Elastic State – V. M. Zhigalkin and G. L. Lindin 139 161

Volume 18, Number 2 March-April, 1977

An Elementary Problem of Radiation Kinetics with Arbitrary Initial Conditions – N. G. Preobrazhenskii and A. E. Suvorov 145 3
Characteristics of a Photodissociation Laser Based on Methyl Iodide – V. A. Dudkin, V. G. Nekrashevich, and V. B. Rukhin 150 9
Volt–Ampere Characteristic and Transition Current of a Gas Gap When Acted upon by Pulsed Ionizing Radiation – V. A. Argunov, V. V. Zakharov, G. F. Ioilev, and E. V. Chekhunov 154 14
Positive Column of a Glow Discharge in Flowing Nitrogen – L. M. Dmitriev 157 18
Deceleration of a Strong Shock Wave by a Transverse Magnetic Field at Substantial Magnetic Reynolds Numbers – D. A. But and B. A. Sluchak 160 22
Thermal Mechanism of the Increase in the Normal Rate of Propagation of a Flame in a Preconduction Electric Field – G. M. Makhviladze and V. I. Myshenkov 165 29
Dynamics of a Vapor–Gas Bubble Formed by Laser Breakdown in a Liquid – Yu. I. Lysikov 173 39
Asymptotic Curve of the Scattering of the Products of a Steady-State Detonation – L. A. Merzhievskii and V. A. Filimonov 177 43
Numerical Calculation of Parameters of Two-Layer Detonation – A. M. Mardashev 183 50
Generation of a Plane Relaxation Wave in an Aerocolloidal Suspension of Solid Particles – A. D. Gol'tsiker, S. V. Tarakanov, O. M. Todes, and S. A. Chivilikhin 188 57
Effect of the Gradient of the Velocity of the Flow on the Effectiveness of a Gas Curtain in Axisymmetric Nozzles – É. P. Volchkov, V. K. Koz'menko, and V. P. Lebedev 196 67
Stability of a Plane Jet in a Medium with Relaxation – V. V. Sobolev and O. Yu. Tsvelodub 201 73
Asymptotic Solution of the Problem of Outflow of Heavy Laminar Jets of Nonmixing Liquids – V. I. Eliseev 205 78
Stabilization of Solutions of Two-Dimensional Equations of Dynamics of an Ideal Liquid – G. V. Alekseev 210 85
Inclination Angles of the Boundary in Moving Liquid Layers – O. V. Voinov 216 92
Circulation Flow of an Ideal Liquid near Walls – I. A. Belov 223 99
Experimental Investigation of the Reiner Centripetal Effect in Liquids – A. A. Sharts 228 105
Problem of Control of the Level of Groundwater during Irrigation for the Three-Dimensional Case – N. N. Kochina 231 109
One Pulsed Hydrodynamic Model of a Cratering Explosion – N. B. Il'inskii 236 115
Plane Waves in Nonlinear Viscous Multicomponent Media – G. M. Lyakhov and V. N. Okhitin 241 121

Method of Determining the Ultimate Dynamic Compression Patterns for Soils and Porous Media Responsive to the Strain Rate – A. I. Kotov and G. V. Rykov 249 130
Shield Properties of a Thin Plate under High-Velocity Impact – L. A. Merzhievskii and V. M. Titov 252 134
Utilization of the Electron-Inertial Effect in Shock Loading to Measure Rod Strain – Yu. G. Kashaev, S. A. Novikov, and V. A. Sinitsyn 257 139
Effect of Critical Shear Stresses behind the Front of a Shock Wave on the Formation of Fragments – S. A. Novikov and A. V. Chernov 260 143
Study of Maximum Stress Field alongside Cracks Emerging from Contours of Openings in a Perforated Plate – V. M. Mirsalimov 263 147
Effective Elastic Moduli of a Fibrous Composite Material, Isotropic on the Average – V. V. Kolokol'chikov and G. N. Sapego 270 155
Self-consistent Field Approximation for an Elastic Composite Medium – S. K. Kanaun 274 160

Volume 18, Number 3 May-June, 1977

Twentieth Anniversary of the Siberian Branch of the Academy of Sciences of the USSR 283 3
Effect of Rate of Replacement of Working Gas on Characteristics of a CO_2 Laser with a Closed Cycle – S. S. Vorontsov, A. I. Ivanchenko, R. I. Soloukhin, and A. A. Shepelenko 285 6
Optimum Conditions for Formation of Short and Long Radiation Pulses in CO_2 Lasers – V. N. Tishchenko 288 9
Influence of Supersonic Flow Heating on the Gain of a Carbon Dioxide Gasdynamic Laser – S. A. Losev and V. N. Makarov 292 15
High-Energy Part of Ion Distribution Function in a Multiple-Mirror Magnetic Trap – Yu. V. Vasil'ev and D. D. Ryutov 295 18
Numerical Evaluation of Diode Gap Bridging by Ions in a Planar Diode – G. V. Stupakov 299 24
Numerical Simulation of the Self-focusing of Wave Packets in a Medium with Striction Nonlinearity – A. F. Mastryukov and V. S. Synakh 304 30
Propagation of a Two-Dimensional Supersonic Radiation Wave – I. V. Nemchinov, M. P. Popova, and L. P. Shubadeeva 308 34
Kinetic Model of the Condensation of a Supersaturated Gas – V. K. Konyukhov and V. N. Faizulaev 314 41
Motion of Deflected Front of a Shock Wave in a Nonuniform Medium – A. A. Rumyantsev 319 48
Boundary-Layer Interaction with a Nonequilibrium Two-Phase Stream on a Surface Being Burned Out in an Axisymmetric Laval Nozzle – A. A. Glazunov, E. G. Zaulichnyi, V. Ya. Ivanov, and A. D. Rychkov 323 53
One-Dimensional Pulsation of a Toroidal Gaseous Cavity in a Compressible Liquid – V. K. Kedrinskii 330 62
Shock Structure in a Liquid Containing Gas Bubbles with Nonsteady Interphase Heat Transfer – R. R. Aidagulov, N. S. Khabeev, and V. Sh. Shagapov 334 67

Formation of a Vortex Ring during Ascent of a Large Air Bubble in Water – I. G. Zhidov, E. E. Meshkov, V. V. Popov, V. G. Rogachev, and A. I. Tolshmyakov 341 75
Motion of a Liquid Film on the Surface of a Rotating Cylinder in a Gravitational Field – V. V. Pukhnachev 344 78
Turbulent Viscosity for Incompressible Gradient Flows before Separation and on a Rough Surface – V. N. Dolgov and V. M. Shulemovich 351 88
Some Cases of Unsteady Motion of Viscoplastic Media in an Infinitely Long Viscoelastic Tube – R. M. Sattarov 355 93
Complex Heat Exchange in the Case of the Laminar Flow of a Scattering Medium in a Cylindrical Channel – Yu. A. Popov and V. I. Shcherbinin 360 99
Thermal Conditions in Couette Flow of a Viscous Liquid – Zh. A. Zinenko, A. M. Stolin, and F. A. Khrisostomov 363 103
Laminar Heat Convection of a Liquid in an Annular Region with a Given Heat Flux – V. A. Brailovskaya and G. B. Petrazhitskii 368 109
Analytical Investigation of the Solidification Process of a Liquid Metal in Continuous Casting Units – L. N. Maksimov and A. N. Cherepanov 372 115
Effect of the Initial Density of a Substance on the Conditions of Oblique Collision of Shock Waves – N. A. Kostyukov 379 124
Piercing of a Barrier under the Impact of Glass Particles Simulating Stony Meteorites – A. P. Anikieva, L. A. Merzhievskii, and V. M. Titov 384 131
Experimental Investigation of the Dynamics of Growth of Brittle Fractures – V. I. Arkhipov and L. A. Maslov 390 137
Interaction between Cracks Positioned at an Angle – I. D. Suzdal'nitskii 394 142
Determination of the Rate of Evolution of Elastic Energy for a Γ-Shaped Crack by the Method of Measurement of the Pliability – L. P. Frantsuzova 397 146
Solution in the Form of Series of Legendre Polynomials of an Axisymmetric Mixed Problem for a Hollow Elastic Cylinder – G. V. Ivanov 401 150
Problem of Plane Strain of Hardening and Softening Plastic Materials – A. F. Revuzhenko and E. I. Shemyakin 406 156
Forming of Fibrous Lightguides with a Small Azimuthal Asymmetry of the Billet – M. E. Zhabotinskii and A. V. Foigel' 420 175

BOOK REVIEWS

Yu. E. Nesterikhin (editor), Laser-Doppler Velocity Meters – Reviewed by B. S. Rinkevichyus 427 183

Volume 18, Number 4 July-August, 1977

Distribution of Vibrational Energy in a Binary Reactive Mixture of Molecular Gases in a Field of Resonance Laser Radiation – T. Z. Kalanov, A. I. Osipov, and V. Ya. Panchenko 429 3
Calculation of Chemical- and Vibrational-Nonequilibrium Flow of a Multicomponent Gas through a Nozzle – V. M. Vasil'ev, S. V. Kulikov, and O. V. Skrebkov 437 13

Theory of a Steady CO Laser – A. P. Napartovich, I. V. Novobrantsev, and A. N. Starostin 445 21
Calculation of Development of a Laser Explosion in Air with Allowance for Emission – I. V. Nemchinov and V. V. Svettsov 448 24
Optical Strength of Weakly Absorbing Drops in Intense Light Fields – A. A. Zemlyanov, V. A. Pogodaev, V. N. Pozhidaev, and L. K. Chistyakova ... 455 33
Absorption Coefficients of Spark-Channel Plasma in a Solid Dielectric – B. V. Semkin and B. G. Shubin 459 38
Non-Self-sustained Discharge with Recovery of Ionizing Beam – L. P. Fominskii 461 40
Evolution of a One-Dimensional Magnetosonic Soliton – A. V. Gordeev 467 47
Calculation of Toroidal Inductive Accumulators with a D-Cross Section from Parameters of a Discharge Pulse and of the Charging Device – I. A. Ivanov, V. V. Sizov, and V. A. Trukhin 473 55
Calculation of Thermal Stresses Arising in Electrically Conducting Materials with the Passage of a High-Current Pulse – S. A. Balankin, L. P. Gorbachev, E. G. Grigor'ev, and D. M. Skorov 479 61
Experimental Investigation of Gasdynamic Processes at Sudden Start-up of a Supersonic Nozzle – L. G. Gvozdova and Yu. V. Zhilin 484 66
Experimental Investigation of Total Flow and Directional Diagrams in Discharge of Gas to Vacuum through Capillaries of Different Lengths – S. T. Barashkin, B. T. Porodnov, and M. F. Chemagin 491 74
Experimental Investigation of the Effect of Velocity Lag of Particles in a Supersonic Gas Stream – A. P. Alkhimov, A. N. Papyrin, A. L. Predein, and R. I. Soloukhin 496 80
A Method of Calculating an Induction Flowmeter for Pipelines of Large Through Cross Section – A. S. Petrazhitskii and V. É. Tsirkunov 503 88
Process of Opening of an Inelastic Diaphragm in a Shock Tube – V. A. Volkov, V. N. Parmon, and B. K. Tkachenko 506 92
Transient Heat–Mass Exchange near a Spherical Particle – R. I. Nigmatulin and I. Kh. Rakhmatulina 509 95
Dynamics of a Cylindrical Cavity in a Compressible Liquid – V. K. Kedrinskii and V. T. Kuzavov 515 102
Expansion of Gas Cavity in Brittle Rock with a View to Dilatation Properties of Soil – S. Z. Dunin and V. K. Sirotkin 519 106
A Method for Investigating Material Properties during Dynamic Elongation – B. I. Abashkin, I. Kh. Zabirov, V. S. Lobanov, and V. G. Rusin 522 109
Tensile Stresses in Target upon Collision of Rigid Bodies – M. S. Kachan and Yu. A. Trishin 526 114
Shock Adiabats and Profiles of Weak Shock Waves in Metals – N. S. Kozin and N. K. Kuz'mina 535 124
Perturbation of the Front of a Flat Plastic Wave – E. I. Romenskii 543 133
Equations of the Linear Theory of Elasticity with Point Maxwellian Sources of Stress Relaxation – S. K. Godunov and N. N. Sergeev-Al'bov 549 140
Propagation of a Two-Dimensional Plastic Wave in a Nonlinearly Compressed Half-Plane – N. Mamadaliev and V. P. Molev 561 152
Approximate Equations of Dynamics of an Elastic Layer – V. A. Saraikin 564 156
Dynamics of a Rectilinear Isolated Crack Growing at a Constant Rate under Conditions of Antiplane Deformation – E. N. Sher 573 166
Crack Propagation in Unoriented Amorphous Polymers – V. N. Gul'nyashkin and S. I. Detistov 584 177
Stability of Compressed Viscoelastic Orthotropic Shells – V. D. Potapov 586 180

Volume 18, Number 5 September-October, 1977

Calculation of Probabilities of Vibrational–Translational and Vibrational–Vibrational Exchanges between Isotopic Variants of Nitrogen Molecules at Low Temperatures – V. M. Akulintsev, N. M. Gorshunov, and Yu. P. Neshchimenko 593 5
A Method for Integrating the Fokker–Planck Equation – S. A. Reshetnyak and L. A. Shelepin 599 13
Approximation of Integrodifferential Equation by an Equation of Fokker–Planck Type – M. N. Safaryan 602 16
Effect of High-Frequency Electric Field on Dispersion of Surface Waves Excited by an Electron Beam – V. V. Demchenko and A. Ya. Omel'chenko 609 24
Limiting Current of a Conical Beam – A. S. Chikhachev 611 27
Experimental Verification of Radiation from Compton Electron Currents – G. M. Gandel'man, V. V. Ivanov, Yu. A. Medvedev, B. M. Stepanov, and G. V. Fedorovich 613 30
Measurement of Spatial Distributions of Residual Gas Density and Electrical Potential in a Plasma – V. N. Bocharov, A. M. Kudryavtsev, A. F. Sorokin, and Yu. N. Ul'yanov 617 35
Electric Strength and Electrical Conductivity of a Volume Discharge in the Presence of External Ionization – V. A. Feoktistov 622 41
Equilibrium and Stability of the Separation Surface between a Liquid Dielectric and a Perfectly Conducting Liquid – A. I. Zhakin 627 47
Effect of Roughness on Frictional Resistance of a Surface during Gradient Flow of a Compressible Gas with Heat Transfer – G. F. Sivykh 632 52
Analysis of the Sound Field of a Large Span Oscillating Body of Revolution – D. N. Gorelov 637 59
Shock Loading of an Infinite Plate Contiguous to a Fluid – V. P. Yastrebov 642 65
A Self-similar Solution for Fan Jets with an Arbitrary Degree of Swirling – E. M. Smirnov 647 71
Stability of Poiseuille Flow in an Elastic Channel – O. Yu. Tsvelodub 650 75
Viscosity of a Dilute Suspension of Rigid Spherical Particles in a Non-Newtonian Fluid – Yu. I. Shmakov and L. M. Shmakova 655 81
Flow and Heat Transfer in the Thermogravitational Generation Mode – A. F. Polyakov 659 86
Limit Problems on Heat or Mass Transfer to a Cylinder and Sphere Submerged in an Infiltrable Granular Layer – Yu. A. Buevich and D. A. Kazenin 666 94
Effect of the Axial Component of the Heat Flux on Solidification of a Metal with Continuous Casting – A. N. Cherepanov 673 102
Non-Steady-State Theory of Vapor-Phase Ignition and Combustion of a Metal Particle – M. A. Gurevich, A. Ya. Lukin, G. I. Sirkunen, and A. M. Stepanov 678 108
Experimental Determination of the Kinetics of Relaxation Processes during the Shock Compression of Condensing Media – G. I. Kanel' 685 117
Dynamic Compressibility, Electrical Conductivity, and Sound Velocity behind a Shock Front in Kaprolon – L. V. Kuleshova and M. N. Pavlovskii 689 122
Nonstationary Plane Waves in Media with Bulk Viscosity – G. M. Lyakhov and V. N. Okhitin 693 126
Relation between Static Mechanical Characteristics and Impulse Stress in Metal Rods – V. M. Glazkov, L. A. Kudryavtseva, and V. I. Sukhin 700 135
A Solid–Liquid Model of an Explosion in the Ground – É. B. Polyak and E. N. Sher 702 137
Mechanical Properties of Soils Taking Account of Their Viscoplastic Properties with Short-Term Dynamic Loads – Z. V. Narozhnaya and G. V. Rykov 706 141
Theory of Stability of Compressible Elastoplastic Ground – A. N. Sporykhin 712 148
Variational Method for Solving Problems of the Plasticity of Compressible Media – I. S. Degtyarev 716 153

Stability of an Elastoplastic Sphere under External Pressure – A. V. Skachenko and A. N. Sporykhin 718 155
Maximum Stability Formulas for Reinforced Cylindrical Shells under External Pressure – V. M. Pavlov and L. I. Shkutin 721 159
Exact Solution of Problem of Deflection of an Anisotropic Plate with an Aperture – T. L. Martynovich 728 168
Temperature Influence in Use of an Interference Method to Study the Effects of Normal Stresses – A. A. Sharts 735 177

Volume 18, Number 6 November-December, 1977

Vector Theory of Self-focusing – A. A. Kolokolov and A. I. Sukov 739 3
Plasma Heating at Constant Impedance – M. E. Gertsenshtein and V. A. Pogosyan 741 6
Electron Temperature Difference in Flow Core of an MHD Accelerator Channel – V. I. Belykh 744 10
Effect of Strong Electric Field on Light Flash Excited by a Gamma-Ray Source in Air – A. V. Zhemerev, Yu. A. Medvedev, and B. M. Stepanov 746 12
Electrophysical Properties of a Detonation Plasma; High-Speed Explosive Circuit Breakers – A. P. Ershov, P. I. Zubkov, and L. A. Luk'yanchikov 750 19
Investigation of Flow in the Chamber and Channel of a Variable-Area Shock Tube – A. M. Naumov and L. S. Shtemenko 754 24
A Method of Determining the Performance of Low-Density Gasdynamic Tubes – S. N. Abrosimov and B. F. Shcherbakov 757 28
Modeling of Natural Ionospheric Flight Conditions – B. E. Zhestkov and A. Ya. Knivel' 760 31
Supersonic Flow over Sharp-Edged Wings – G. P. Voskresenskii, A. S. Il'ina, and V. S. Tatarenchik 763 35
Calculation of Interaction of a Turbulent Near-Wake behind a Step with a Supersonic Jet – A. N. Antonov 769 43
Formation of Noncirculating Regions in the Axial Zone of a Vortex Cell – M. V. Bashkatov 775 51
Secondary Flows beside a Cylinder in a Complex Sound Field – V. B. Repin 779 56
Deformation of Liquid Line with the Collision of Jets – M. V. Rubtsov 786 65
Vortical Momentum of Flows of an Incompressible Liquid – V. A. Vladimirov 791 72
Two Exact Solutions of the Navier–Stokes Equations for the Concentration of Eddies in a Viscous Liquid – V. I. Likhoperskii 795 77
Calculation of Nonstationary Finite-Amplitude Wind Waves – R. L. Kulyaev 799 82
Hydrodynamic Stability of Two-Dimensional Poiseuille Flow of a Non-Newtonian Liquid with a High-Viscosity Core in a Cooled Channel – A. S. Romanov 802 86
Mass Transfer in a Liquid Layer of Variable Thickness on a Rotating Archimedes Spiral Taking Account of the Entrance Region – N. M. Zhavoronkov, V. A. Malyusov, N. S. Mochalova, and L. P. Kholpanov 806 91
Concentration Convection in a Solidifying Melt – P. F. Zavgorodnii, V. I. Kolesnik, I. L. Povkh, and G. M. Sevost'yanov 812 98
Stability of Elastoplastic Flows – V. M. Volchkov, M. A. Vinogradov, and A. A. Kozlov 816 103

A Technique for the Solution of Wave Problems for a Nonlinear Compressible Medium – N. Mamadaliev and Sh. Mamatkulov 818 106
Structure of Elastic Discontinuities on Shock Profiles in Viscoelastic Media – N. S. Kozin 823 112
Theory of Shock Waves in Media Undergoing Phase Transitions – Yu. Ya. Boguslavskii 828 119
Spherical Detonation Waves in Media with Volumetric Viscosity – G. M. Lyakhov and V. N. Okhitin 834 126
Optimum Conditions for Excitation of Elastic Vibrations in Solids by Pulsed Ionizing Radiation – V. D. Volovik and S. I. Ivanov 842 137
Upper Evaluation of Power of Surface Forces with Deformation of a Medium with a Limited Intensity of Tangential Stresses – G. V. Ivanov 845 141
Measurement of Multipoint Moments of Composite Structures – V. V. Dudukalenko, N. N. Lysach, and S. I. Meshkov 848 145
Dynamics of a Short Steel Bar with Inhomogeneous Properties of Lagging Creep along Its Length – G. I. Popov 852 149
Time Criteria of Explosive Fracture – Yu. I. Fadeenko 856 154
Special Characteristics of Flow of Viscously Free-Flowing Media in Tubes – I. B. Basovich, M. G. Bernadiner, and L. V. Eroshina 860 159
